

Background

With the COVID-19 pandemic's growing impact on our lives, an increasing number of organisations are undertaking innovative approaches to help their communities be more resilient in the face of the pandemic and other real-world challenges.

The Geo-Innovation Challenge is a competition that seeks to explore and promote the groundbreaking geospatial solutions that is helping the following local industries adapt and embrace "the new normal"

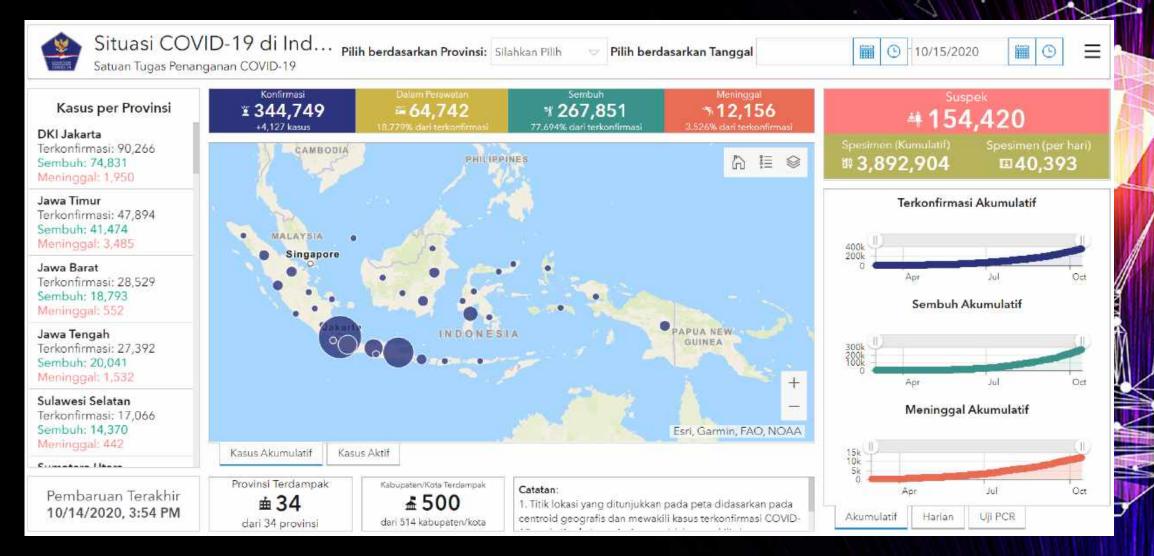

Objective

We will be looking at how the technology is playing part :

- In increasing overall resilience
- Achieving greater operational effectiveness
- Enhance community engagement
- Strengthen business continuity
